Buyers Guide to Contract Heat Treatment

**Your definitive guide to sourcing from
70 UK-wide subcontract heat treatment specialists**

BUYERS GUIDE and WEBSITE

Contract Heat Treatment – the Preferred Option

Heat treatment encompasses a wide variety of thermal processes applied with the objective of either facilitating the efficient formability of metals or enhancing the service performance of components. As such, it is a hugely important step in the manufacturing cycle.

Today the specialist contract heat treater is the preferred source of heat treatment for a large section of industry. Any realistic assessment of "in-plant" treatment costs which takes account of all the factors involved will show that contract treatment offers the most effective option in all but a minority of special situations.

By the use of contract heat treatment you can:

- reduce your capital plant requirements;
- release valuable works space for more of your core activity;
- avoid the cost of providing the highly-skilled supervision needed to manage today's sophisticated treatments;
- achieve greater flexibility in selecting the best treatment for each job;
- access new treatments and procedures immediately they are available, without capital cost.

Representing the majority of the UK subcontractors in this field, the Contract Heat Treatment Association (CHTA) has compiled this Buyers Guide, and its complementary website at www.chta.co.uk, to assist you in making the most of these benefits.

Using a Contract Heat Treater

In order to benefit fully from the services of a company featured in this Guide, it is recommended that buyers of contract heat treatment should involve the intended supplier at the earliest moment.

CHTA member companies have a wealth of experience in heat treatment which can:

- make a positive contribution in the selection of the most appropriate treatment;
- warn of possible pitfalls;
- help you avoid costly mistakes.

But all of this can only happen if you choose to draw upon this expertise and specialist knowledge.

Quality Assurance

All companies listed in this Buyers Guide are members of the CHTA and, as such, are pledged to maintain the highest standards of quality and service. ISO 9001:2000 is currently the universally-accepted quality standard, but many members hold additional quality approvals from major organisations, which are especially relevant in particular market sectors.

Using this Buyers Guide will put you in touch with specialists who can assist you and your business. The same information, and more, is available on-line at:

www.chta.co.uk

CHTA's website is designed to enable you to make best use of member services:

- By clicking on "Buyers Guide", an automated facility enables you to search a version of this Guide in database format. You can find speedily the companies offering services to match your requirements, see details of the companies selected, and submit enquiries to one or more with a single click.
- View CHTA's quarterly newsletter, updating on latest developments, by clicking on "Hotline". Contact CHTA's Secretariat to receive a regular hard copy.
- Click on "Specifying Heat Treatment" to access CHTA's series of *Datasheets for Non-heat-treaters*, aimed at aiding sensible specification of contract heat treatment processing and avoidance of common problems. Couched in layman's terms, they answer the questions:
 - What are the treatments?
 - What are the benefits?
 - What materials can be treated?
 - What are the limitations?
 - What problems could arise?
 - How do I specify?
 - Where do I go?

In response to the last question, the datasheets recommend that you contact the appropriate CHTA member companies listed in this Guide.

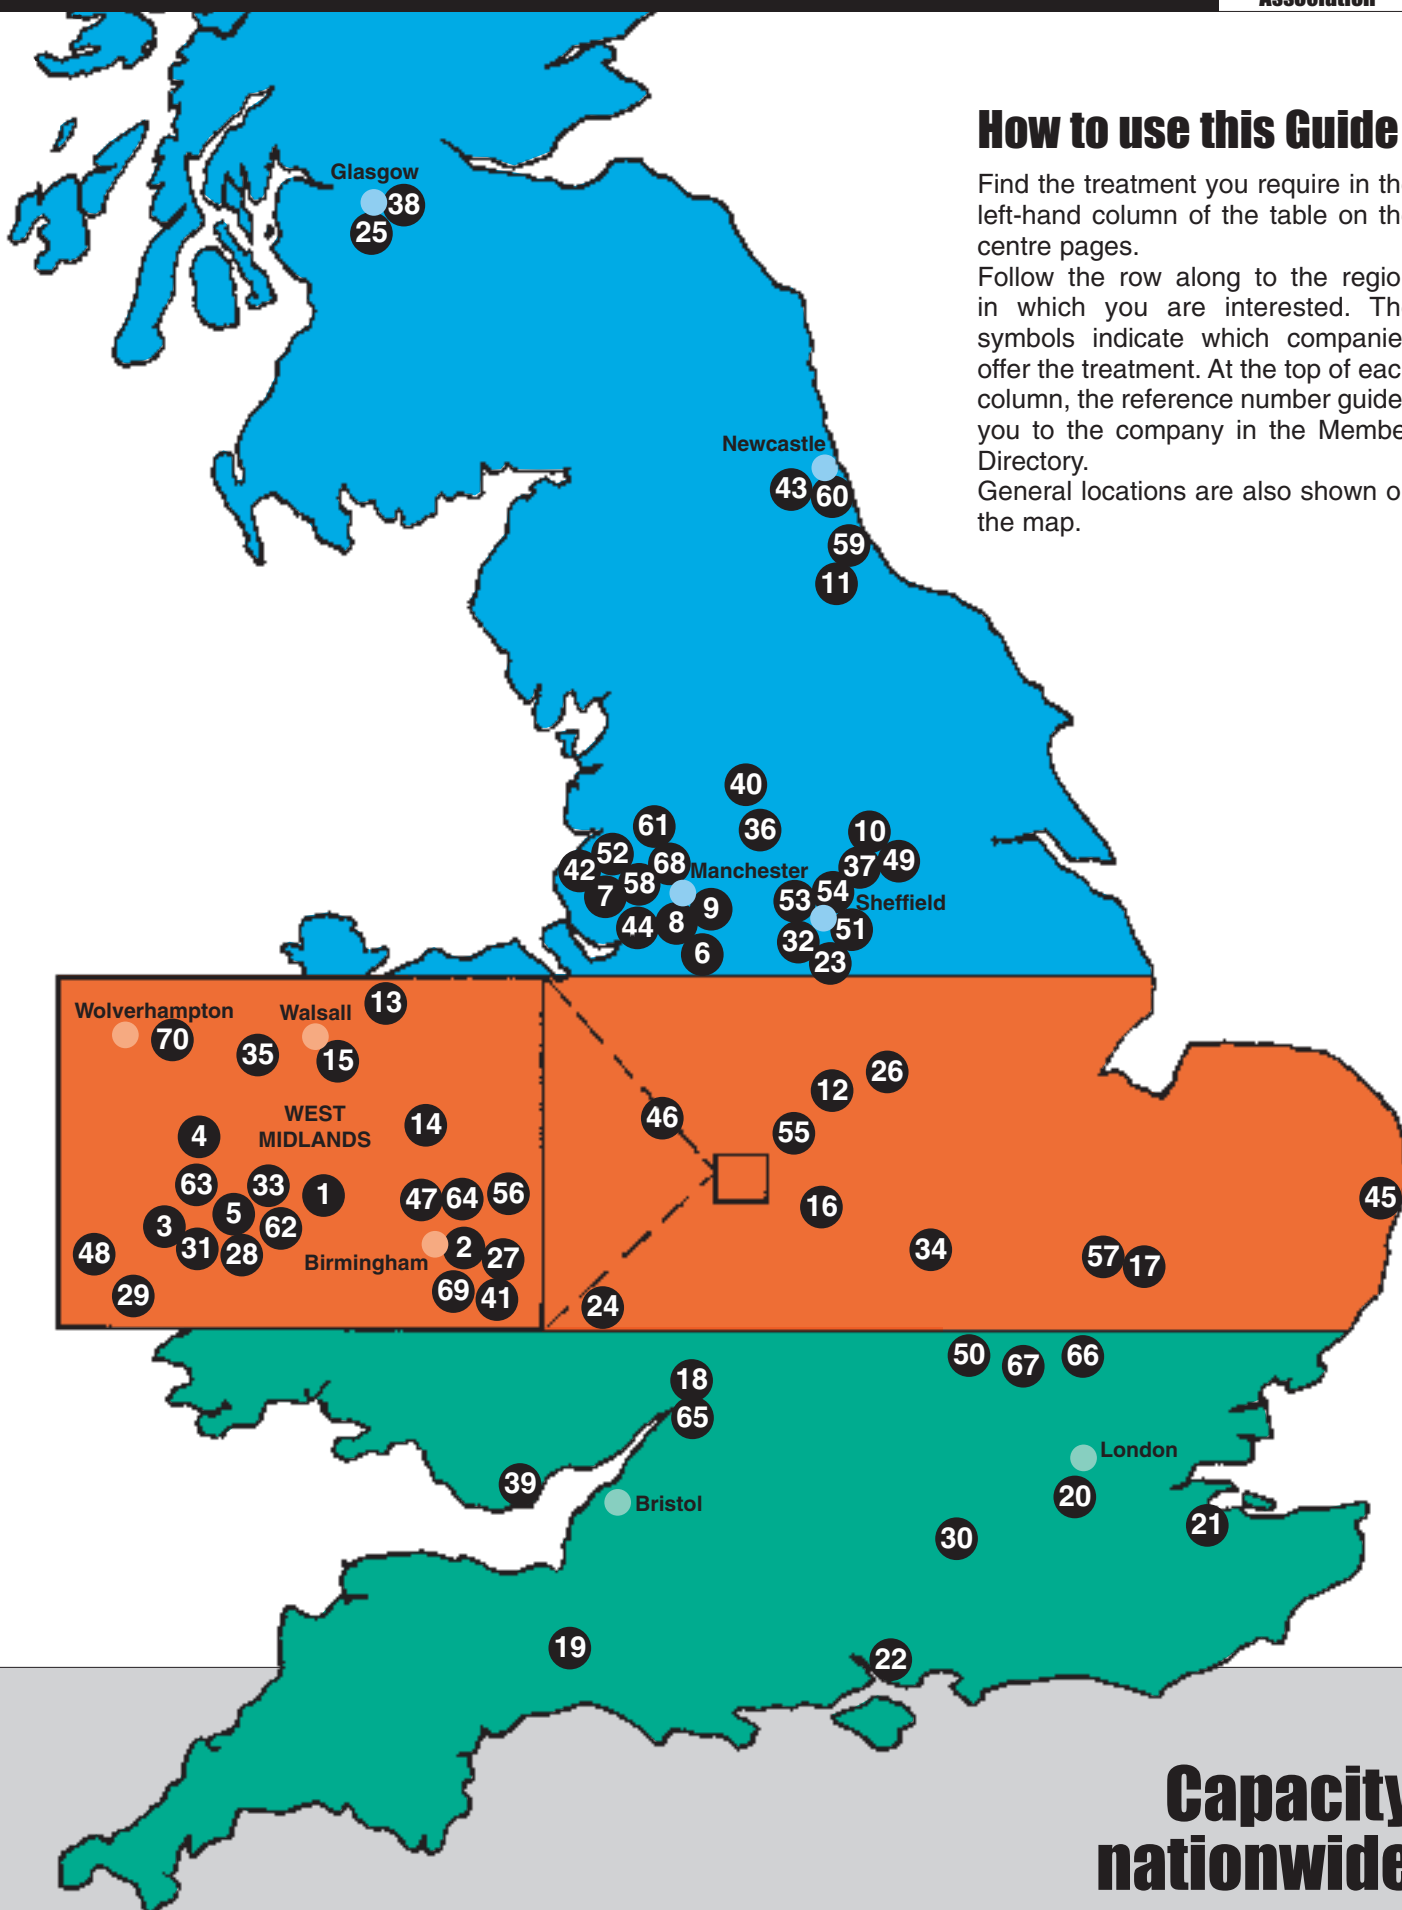

MEMBER LOCATION

How to use this Guide

Find the treatment you require in the left-hand column of the table on the centre pages.

Follow the row along to the region in which you are interested. The symbols indicate which companies offer the treatment. At the top of each column, the reference number guides you to the company in the Member Directory.

General locations are also shown on the map.

**Capacity

The Surface Engineering Association

If you can tick any of these boxes, you would benefit from being a member.

Can you offer:

- Subcontract Heat Treatment
- Painting / Powder Coating
- Surface Finishing

Do you manufacture and/or sell:

- Process Chemicals
- Plant, Equipment and Ancillary Products
- Effluent Treatment Services

Need to reduce energy:

- Climate Change Levy
- IPPC Permit Conditions

Red tape overload with:

- Health & Safety Matters
- COMAH
- IPPC
- UK & EU Legislation

Join us Call: +44 (0)121 237 1123
 Website: www.sea.org.uk

The SEA provides the focus for all aspects of the surface engineering industry.
